

STAR SEEKERS

FARTHEST SPACE — THE YEAR 3091!
EXPLORING FOR A SUITABLE PLANET TO
COLONISE, SPACE WARPERS THREE WAS LIGHT
YEARS AHEAD OF THE EXODUS FLEET
LEAVING THE DYING EARTH . . .

WHERE EXACTLY ARE WE?

BOYS, BRACE YOURSELVES FOR THE GOOD
NEWS. WE'RE NEAR A G-2 STAR LIKE SOL
AND ONE EARTH-TYPE PLANET. READINGS
SHOW WE HAVE FOUND A PLACE WHERE
HUMANS CAN EXIST.

The crew were Ensign Hod Sholto, Android
AD964 and ship controller Vak Kline.

KLINE, WITH RESPECT, I
MUST BEG TO DISAGREE.

THIS STAR IS A SPECTRAL
B-1 AND THE PLANET A
GAS GIANT!

OH, A SPACER'S LOT CAN
BE A HAPPY ONE. TEE-DUM!
TEE-DUM!

OBVIOUS MALFUNCTION
OF YOUR SCAN, ANDY.

SIR, MAY I SHOW YOU
WHAT MAY EXPLAIN THIS
DIFFERENCE OF OPINION.

KLINE'S LIFE SUPPORT
SYSTEM, SIR. THE JARRING
OF OUR RECENT RE-ENTRY
APPEARS TO HAVE CAUSED
DAMAGE WHICH HAS
VASTLY INCREASED THE
HYDROXIL IN THE NUTRIENT
STREAM.

HEY THERE! WHY ARE YOU
MEDDLING WITH MY
SUPPORT FUNCTION?

MERELY MAKING A SLIGHT
ADJUSTMENT.

YOU MEAN KLINE'S
MIND IS BLOWN!
